[ **Product Name** ] Golden Rod Extract

[ **Other Name** ] Common Goldenrod Extract; Solidago Gecurrens Extract

[ **Source** ] *Solidago decurrens* Lour.

[ **Used Part** ] Aerial parts

[ **Specification** ] 5%, 10% Flavonoids; 4:1, 5:1, 8:1

[ **Detection Method** ] HPLC / TLC.

[ **Characteristics** ] Yellow brown fine powder.

[ **Package** ]
25 kgs/drum. Packed in paper-drums and two plastic-bags inside. Or according to customer's requirements.

[ **Storage Situation** ]
Stored in a cool and dry well-closed container, keep away from moisture and strong light / heat.

[ **Shelf Life** ]
Two Years under well storage situation; Tightly sealed in a clean, cool, dry area. Keep away from diret light.

[ **Function** ]
Goldenrod has an unusual ability to crossbreed with other plants, there are at least 130 recognizable species of goldenrod in the United States alone. This herb is native to Europe and has spread to Asia, the Azores, and both North and South America. The ability of goldenrod to flush water from the body, combined with its anti-inflammatory and antimicrobial (ability to fight infection) properties, it is used by herbalists for a wide range of health problems including: Arthritis, Allergies, Colds and flu, Inflammation of the
bladder or urinary tract, Kidney stones, Laryngitis, Sore throats.

Beneficial to the kidneys, especially when the urine is dark and cloudy, and helps to clear up kidney and bladder stones. Goldenrod helps with kidney and urinary infections and to ease the backaches often associated with these conditions. Its astringency makes it useful for treating diarrhea and internal hemorrhaging. Goldenrod is used in the treatment of arthritis because of its cleansing and eliminative actions, and it is clearing of mucus in the upper respiratory tract.

The fresh leaves of Goldenrod can be used as a poultice for wounds, sores and insect bites.
